+ About CodeChef SCET Chapter:

- CodeChef college chapters consist of a group of students at colleges who are interested in working together and increase their skills and help their community grow with programming and coding.
- With about 280 chapters globally, the SCET chapter is also a part of it where students conduct workshops, talks, events, and various activities to promote programming culture along with best coding practices.
- As the chapter is managed by the students and for the students, all are welcome to contribute and work together.
- With support and resources from CodeChef, different kinds of events can also be hosted on the CodeChef platform in a completely online manner.

+ Event Insights:

Upon the start of an event, the excited participants started solving the problem statements and as time progressed, participation kept on increasing. Novice coders also participated where it was a chance for them to learn and start with competitive coding whereas it was a battle for the experienced coders to see who could solve all the problems in the least amount of time and who could top the leaderboard. With all the problem statements comprising different logics and programming concepts, along with the freedom to choose any programming language, it was a learning event as well as a competition.

The overall response was great and it was a very successful event.

In all, more than 180 participants registered for the event where participants from the international platform also competed.

The 5 countries from which participation was received is as below:

- India
- Azerbaijan
- Ukraine
- Bangladesh
- United States

Students from around 93 colleges/universities/institutes participated (including NITs, IITs, IIITs and more):
